

Sutton Air Filter

Proudly Manufactured
in Western Canada

Product Overview & Applications

The high-capacity Sutton Air Filter has a lower clean pressure drop which saves energy costs. The higher pleat count increases the life of the filter. Sutton Air Filters are constructed in 4" and 5" depths to fit most common residential sizes and can be custom made to fit other sizes of air cleaners.

Applications

Sutton Air High Efficiency filters are designed to remove dust, pollen, mould spores, pet dander and other particles from your home. Available in MERV 11 and MERV 13 efficiency, Sutton Air filters have an increased pleat count when compared to most other residential filters.

Odour Removal

The Sutton Air Model SAF1300D combines a high efficiency particulate layer with an activated carbon layer to remove particulate and odours from wildfires, sewage odours, household chemicals and common nuisance odours.

Sutton Air: At a Glance

- **Increased Pleat Count:** Extends life and reduces energy costs
- **Excellent Odour Control:** Additional Carbon layer is available on Model SAF1300D to help remove particulate, smoke and odours from wildfires, sewage, household chemicals and more
- Model SAF1100 achieves a MERV 11 Rating while Model SAF1300 achieves a MERV 13 rating

Performance Data

Filter Model	MERV Rating	Rated Initial Resistance *		Recommended Final Resistance	
		Inches w.g.	Pa	Inches w.g.	Pa
SAF1100	11	0.06"	15	0.5"	125
SAF1300	13	0.14"	35	0.5"	125
SAF1300D	13 c/w Carbon Layer	0.25"	62.5	0.5"	125

* at a velocity of 300 fpm.

The Leader in Filtration

For over 50 years, BGE has been the leader in filtration solutions in Western Canada. We believe that every job is unique and has its own distinctive requirements. Our years of experience and partnerships have helped us develop quality products like the Sutton Air Filters. With our manufacturing division based out of Edmonton, we make sure that we are able to develop products that are uniquely catered to solve your air quality challenges.

Clean air matters.
