

# Pad Pro Frame

Proudly Manufactured  
in Western Canada

## Product Overview & Applications

The Pad Pro Frame is a durable and long lasting metal frame designed to allow for easy changeout of filter media pads.

The frame is constructed from a single piece of 22-gauge, galvanized steel U-channel which forms a seal around the entire perimeter of the frame to contain the pad and prevent leakage or dirty air bypass. The welded mesh support grid and 9-gauge hinged retainer gate provides an extra level of pad support which prevents sagging or blowout, even when heavily loaded.

Ideal for heavy dirt loads and challenging environments, the Pad Pro frame fits universal holding frames and side access housing tracks. Its sturdy design ensures consistent performance in high-velocity and turbulent conditions, with the flexibility to be bolted together for larger installations.

With our in house manufacturing division, BGE is able to offer standard and special sized frames to ensure a correct fit.

### Pad Pro: At a Glance

- **Cost-Effective:** Reduces filter maintenance costs by using replaceable media pads instead of disposable framed filters
- **Secure Fit:** U-channel cell sides are welded retainers prevent sagging, blowout, and dirty air bypass
- **Versatile Application:** Fits universal frames and side access tracks; can be bolted together for larger installations
- **Durable Construction:** Made from 22-gauge galvanized steel, ensuring long-term reliability in demanding conditions
- **Customizable Sizes:** Available in standard 1", 2", 4" and custom sizes to fit various Filtration systems and specific application needs
- **Enhanced Strength:** Features an expanded metal support grid that provides robust stability, ensuring pad integrity even under high airflow and turbulent conditions

### The Leader in Filtration

For over 50 years, BGE has been the leader in filtration solutions in Western Canada. We believe that every job is unique and has its own distinctive requirements. Our years of experience and partnerships have helped us develop quality products like the Pad Pro. With our manufacturing division based out of Edmonton, we make sure that we are able to develop products that are uniquely catered to solve your air quality challenges.

When Clean air matters.
