

Front Line Overspray Collection Media

Performance Data

Media Designation	Front Line Paint Arrestor
Media Thickness	2"
Initial Resistance	.08" W.G. (300 FPM)

Specifications

Construction:

Front Line Paint Arrestor pads are designed exclusively to collect overspray. A specially formulated thermoset resin provides high compression strength preventing Frontline Paint Arrestor pads from collapsing and face loading as they become saturated. The glass fibers are designed with an open weave pattern to allow overspray to penetrate deep into the pad. Overspray is collected throughout the full depth of the media pad, providing excellent holding capacity and high removal efficiency.

Color:

Green on the air leaving side; white on the air entering side.

Dust Adhesive:

None.

Availability:

Standard size pads – 20"X20", 20"X25", 24"X24" – 50 filters per carton.

Standard size rolls – 20"X300', 24"X300', 25"X300', 30"X300', 36 1/4"X300', 40 1/4"X300'.
