

Gold Excell Commercial Duty Panel Filters

Proudly Manufactured
in Western Canada

Product Overview & Applications

Robust Dust Handling Capabilities

The Gold Excell provides MERV 7 performance and is available in 1" and 2" depths. With its industrial grade adhesive, it provides robust dust holding capacity and serves as an excellent prefilter to higher efficiency filters.

Application

The Gold Excell filters are designed for general air filtration in various types of industrial and commercial HVAC systems. They are ideal for installations with medium to high dust loading conditions.

Gold Excell: At a Glance

- **More media surface area:** More glass fibers per square foot than standard filters
- **Durable Frame:** The media pack is encased in a double wall, moisture resistant, beverage board diecut frame
- **Heavy Gauge Retainers:** Corrosion resistant, heavy gauge retainers on air entering and air leaving side help prevent blow-out and contamination of air handling systems
- **Long Service Life:** Increased dust holding capacity while eliminating face loading and increasing arrestance

Performance Data

Filter Depth	Rated Filter Face Velocity		MERV Rating	Rated Initial Resistance		Recommended Final Resistance	
	Ft/min	m/s		Inches w.g.	Pa	Inches w.g.	Pa
1"	300	1.52	7	0.11"	28	0.30"	75
2"	500	2.54	7	0.26"	65	0.60"	150

The Leader in Filtration

For over 50 years, BGE has been the leader in filtration solutions in Western Canada. We believe that every job is unique and has its own distinctive requirements. Our years of experience and partnerships have helped us develop quality products like the Gold Excell. With our manufacturing division based out of Edmonton, we make sure that we are able to develop products that are uniquely catered to solve your air quality challenges.

Clean air matters.
